

*TCPH Medical Director Mix 2009*

*To be sung to the tune of*

*“Let It Snow Let It Snow Let It Snow”*

*Public Health this year’s been frightful.*

*A new bug was thought to be mightful.*

*And since it had everywhere to land,*

*Wash your hands!*

*Wash your hands!*

*Wash your hands!*

*H1N1 didn’t show signs of pausing*

*And we had no shots for popping;*

*We had no way to take a stand.*

*Wash your hands!*

*Wash your hands!*

*Wash your hands!*

*When we finally got vaccine,*

*How we loved going out in the land*

*With the messages of good hygiene*

*And plenty of shots in our hands.*

*Now the threat is slowly dying?*

*But my friends we’re not through goodbye-ing,*

*Seasonal and the next wave may be at hand.*

*Wash your hands!*

*Wash your hands!*

*Wash your hands!*

*Written by Dr. Sandra K Parker*
