

Hello Association for Professionals in Infection Control and Epidemiology Chapter leadership,

My name is Chelsey. I am the recruitment outreach assistant at Doctors Without Borders/Médecins Sans Frontières (MSF). I am hoping you might be able to help us recruit Infection Prevention and Control (IPC) managers.

We are **URGENTLY** recruiting **Infection Prevention and Control (IPC) managers** for our projects in 70+ countries. Infection Prevention and Control (IPC) managers manage activities, lead the development and maintenance of an infection-control program in an MSF field project. The goals of the role include striving for good quality of care and the safety of patients, caretakers and staff. In accordance with MSF protocols and standards, IPC managers will participate in the definition of the project's IPC objectives. To learn more: <https://www.doctorswithoutborders.org/careers/work-overseas/find-role/infection-prevention-control-ipc-manager>

In order to attract a diverse applicant pool, I wonder if you could help share this opportunity with your staff and members through your website, listserv, newsletter, social media, mailing list etc. in order to help us fill this urgent field need. This could be a great opportunity for anyone (e.g. RN/NP, MD/DO, MPH, epidemiology or microbiology degree) who has relevant IPC experience (post training) in a healthcare facility to gain international work experience and give back to the global community.

I've attached a flyer and a graphic with some basic information about the job profile and requirements that you can share. Any applicants interested in applying should send their CV or resume to Melissa.bieri@newyork.msf.org with the subject line "Infection Prevention and Control Manager". Please let me know if you have any questions, and I look forward to working with you!

You can reach me by email with any inquiries about this fieldwork opportunity. Thank you for your time.

thanks,
Chelsey

Chelsey Kohnen (she/her)

Field HR Recruitment Outreach Assistant
